Progress Made

A meeting was held at the Regional Board offices (Santa Ana Region) in Riverside on April 25, 2000. The work plan regarding the installation, sampling and reporting for additional monitoring wells was among the topics discussed. Preliminary comments from the Regional Board regarding the work plan included:

- The suggested inclusion of additional analytical parameters;
- modification of proposed maximum well depth;
- and adjusting the proposed location of one well in the southern portion of the former Site.

Lockheed Martin has hired a new environmental consultant (Earth Tech) for the Redlands Site project. As agreed at the April 25, 2000, meeting, a follow-up meeting will be scheduled to discuss the Regional Board staff comments further.

Problems Encountered

No significant problems were encountered during this reporting period.
